

Equipment overview

Trane Rental Services has an impressive array of heating, cooling, power generation and compressed air equipment. Our capabilities include 1- to 1,000-ton units of cooling, 36 kW to 1.6mW of power generation, electric and indirect fired heaters up to 512,000 BTUs, 25 to 300 hp of compressed air and 800 to 1,500 cfm Oil Free Air units.

Air-cooled chillers 10 to 500-ton

Equipped to provide quick restoration of cooling in emergency and planned shutdown situations.

Cooling towers & heat exchangers 250 - 750 ton

Useful for processing and manufacturing applications. Temporarily replace a tower that has gone down.

Water-cooled chillers 250 through 1,000-tons

For large process and comfort cooling applications that require higher efficiency equipment.

Diesel generators 36 kW through 1.5mW

Well-suited for hospitals or industrial facilities that need standby generators when conducting service on existing equipment.

Air-conditioning units 25 through 50-ton

Provide the quickest and easiest source of temporary cold air. Great for special venues such as sporting events.

Portable units 1- to 5-tons

Ideal for server rooms, laboratories and small office spaces. Totally self-contained.

Vertical AC units 10 to 30-ton

Designed for integrated cooling and heating of tent structures and optimized for minimal noise output and footprint.

Oil Free Air compressors 800 to 1,500 cfm

Available for planned or emergency shutdowns. Components available to dry and filter compressed air.

Air handling units 5,000 - 25,000 cfm

Ideal for providing air conditioning to very large warehouses, tents and other facilities.

Temporary heat

Electric heat - 20, 50, and 150 kW

Indirect Fired gas heat - 512,000 Btu heat
